

SINGLE TRAK[®]

LADDER SYSTEM

Cotterman's Single Trak, steel mounted shelf ladder is designed to provide easy access to shelves in narrow aisles and cramped storage areas. These ladders have a smooth rolling upper track fixture and wheels on the floor that allow easy movement of the ladder along the entire length of the track. The upper rolling trolley fixture is mounted on straight track at the front shelf edge. The rugged all-welded steel construction features 5" deep by 14" wide solid steps with abrasive treads.

Quick Access... Easy to use... Easy to store

When in use the ladder is positioned at an 80° climbing angle. The standard bottom wheel brake prevents movement during use. An exclusive design permits storage of the ladder in a tight vertical position against the shelves when not in use and allows easy passage of persons or equipment in the aisle. Cotterman's Single Trak ladder has been a popular favorite for over 70 years. Cotterman's Single Trak Ladder has been proven to save time in accessing verticle storage.

Single Trak Series 7180 is so simple to use and store, it is fast becoming one of the most popular ladders for access to vertical shelf storage.

When not in use a unique design feature allows the ladder to store tight against the shelf for more aisle space.

The Single Trak ladder pulls out to an 80 degree climbing angle.

For fast, easy access to vertical shelving.

Model No.	No. of Steps	Highest Standing Height	Track Mounting Range
7180-5	5	50"	85" to 95"
7180-6	6	60"	95" to 105"
7180-7	7	70"	105" to 115"
7180-8	8	80"	115" to 125"
7180-9	9	90"	125" to 135"
7180-10	10	100"	135" to 145"
7180-11	11	110"	145" to 155"

Track System

GT1004-ST-Kit 4' Track Section with Mounting Bracket

The upper trolley fixture of the Single Trak steel ladder allows a smooth rolling motion the length of the track.

To Order Series 7180 Ladders and Track:

1. From the chart above select the proper model based on top step height required for your application. Keep in mind the maximum working height is approximately 5-6 feet above the top step height shown.
2. Based on the model selected, specify the required track height from the floor to the top of the track (in 1" incr.). Stay within ranges shown.

10 Reasons to use Cotterman Ladders

1. O.S.H.A. - Safety

Cotterman actively participates in OSHA and ANSI committees working on new and existing safety codes. Cotterman is also an active member of the National Safety Council, Scaffold Industry Assoc., and the Material Handling Industry of America.

2. Service - Quick Shipment

We will build and ship the exact ladder you need fast.

3. Long Life

1" square steel tubing and one piece welded construction are used for superior strength and security.

4. Quality

Cotterman is committed to a program of quality assurance that guarantees the highest standards of ladder construction.

5. Variety

Cotterman has the broadest line of exclusive designs, popular sizes and styles of track ladders available anywhere.

6. Easy To Use

The Cotterman caster braking system allows easy movement, requires no adjustment, and is very durable in commercial and industrial environments.

7. Price

Our prices for track ladder systems are very competitive with no extra engineering charges.

8. Colors

A choice of five powder coated colors is offered; gray, beige, black, dark brown, and yellow. Special colors are also available to suit your needs.

9. Experience

With over 90 years of ladder manufacturing experience, Cotterman is a proven leader in commercial and industrial ladder products.

10. Reliability / Commitment

Cotterman has a commitment to deliver quality products to your specific requirements on time - every time.
