The new, simpler design makes it easier to install and adjust. The aluminum build of the rack reduces corrosion and keeps your ladder rack looking like new. It will accommodate a variety of ladders and safely secure them for transport.

Technicians that are 5'-4" or taller can safely load and unload the ladder because of the lower, more ergonomic load and unload height. Durability testing ensures that the rack will stand the test of time and perform as it should for many years.

**EXCLUSIVE!**

With the turn of a knob, you can quickly adjust the rack to fit a wide variety of ladders.

## Ram ProMaster with ErgoRack / Lightweight, Safe and Easy

**PRIME DESIGN™**

A Safe Fleet Brand

Prime Design has been the industry's ergonomic leader since 1992, when we first introduced the concept of an ergonomic ladder rack.

Our design philosophy starts with the worker – how can we make the job safer, easier and more comfortable for the human body? That is because we firmly believe that a product's design and how it impacts the user is every bit as important as the quality of materials and construction.

The ErgoRack was designed to reduce muscle stress, eliminate risk of injury and speed the job of loading and unloading ladders from a work van.

driven to *outperform*™

Link Manufacturing develops an extensive range of aluminum ramps that provide safe, easy and economical solutions for your loading and handling needs. Whether you require a straight, bifold, trifold, swivel, lightweight, heavy duty or a customized cargo ramp solution for your unique needs, you can be confident that each Link aluminum ramp is built to perform in the most challenging conditions. All of our aluminum ramps are engineered, tested and manufactured to the highest quality standards right here in the USA.

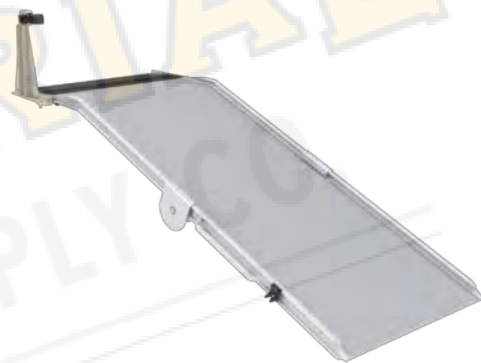

### Mounted Ramps

Link Manufacturing has developed a broad array of deployable mounted aluminum ramp solutions engineered for commercial vans and box trucks. Link's lightweight, lowprofile mounted aluminum ramps vertically mount just inside a vehicle's rear or side doors. Each mounted ramp is made from high-strength aluminum and engineered for simple installation and ease of use. All Link mounted ramps are fast, easy and convenient to deploy.

### Swivel Ramp

Link has put a new twist on aluminum ramps. Our swivel ramp offers unmatched flexibility for loading and unloading any sized cargo, with 180-degree rotation and two storage locations. The swivel ramp mounts in the rear stored position like a traditional folding ramp, but can swing to also be stored inside, behind the wheel well – providing options for instances when a loading ramp isn't needed.

### Portable Ramps

Link's portable aluminum ramps are available for both lightweight and heavy-duty applications, featuring either folding or straight designs. The extensive range of portable ramps provide users with safe, durable, and economical solutions for their cargo loading and handling needs. An optional, high-friction, perforated deck surface is also available for applications where exposure to ice, oils, moisture and other slippery substances are common.

Due to the custom options of these ramps, please contact your Industrial Truck & Van Branch for a custom quote.

## **WE ARE DIFFERENT WHY BUY FROM INDUSTRIAL LADDER?**

**We are "Classic Service"**

### **INDUSTRIAL LADDER'S DIFFERENCE**

Industrial Ladder & Supply Co. was founded in 1975. Our company was established and has been continuously operated as a family owned business since. The founders possessed the experience and knowledge needed to lay the foundation for what would become one of America's largest and most respected Ladder, Scaffold, and Truck Equipment distributors. Industrial Ladder serves the eastern half of the United States from our 5 distribution centers. Most of our deliveries are done on our own company vehicles for a far better customer experience. Today, we are proud to have three generations of family members involved in operating the company.
